DECORATIVE GRILLES

What are Decorative Grilles?

Decorative Grilles are an openwork architectural art form consisting of design patterns made by cutting openings or holes into various material substrates.

Every Air Control Decorative Grille is custom-made and totally unique!

Each is individually crafted to match the style, size, and finish color you specify.

It's a well-known fact that interior design can foster optimism and promote positive mental health. Artistic interior design that engages and stimulates the senses through colors, shapes, patterns, and textures, can create an environment favorable to reducing anxiety, stress, and depression.

Design

Frame: High quality extruded aluminium profile with 30 mm flange standard, ask for other options like 20mm & 12mm.

Core: Core is made up of aluminium sheet-check for available thickness, machined to the desired design patterns required by the customer.

Model – AC - DCG (without damper)

AC - DCR (with damper)
